

PROGRAM

#visualizinghacking2017

Tokyo, June (12th-15th)

The logo for Research Group Collaborative Spaces is a teal square with white text. The text is arranged in four lines: "Research", "Group", "Collaborative", and "Spaces". Below the text are two horizontal white lines, with a white diagonal line forming a trapezoidal shape at the bottom right corner.

1. General program about #visualizinghacking2017 in Tokyo

Our learning expedition will start on Monday, 12th (9 AM) and end on Thursday, 15th (3PM). This experimentation follows **#visualizinghacking2016** in Berlin (see: <https://www.youtube.com/watch?v=gHDNSG4uzBE&feature=youtu.be>). It aims at visiting innovation labs, independent and corporate maker spaces, fab labs, hacker space, coworking spaces, accelerators and incubators, and to take pictures of (or draw) **bricolages, improvisations, creativity movements and hacking gestures which are at the heart of new work practices**. The results will be exhibited in London during the 2nd RGCS Symposium in January 2018 (as we did for the first RGCS Symposium at Paris City hall).

We will be a core group of academics and entrepreneurs exploring, walking and continuously discussing our analyses and surprises. This experimentation will be opened to all people (entrepreneurs, makers, journalists, academics, students, artists...) who want to join us for the visits and/or meeting points. Free registration can be completed via our Eventbrite.

RGCS is an academic network focused on the sharing economy, in particular **collaborative communities and collaborative movements (e.g. coworkers, makers and hackers), and how they transform or make visible new work practices and societal changes**.

Organizing committee: Anouck Adrot (Université Paris-Dauphine, PSL), François-Xavier de Vaujany (Université Paris-Dauphine, PSL), Charles-Baptiste Gérard (quantstrat), David Vallat (Université Lyon I), Tuukka Toivonen (UCL).

Contact: collaborativespaces@gmail.com or @collspaces
